 Pennsburg, PA: (215) 292-2208

Busbars
 Circuit Breakers
 Contactors & Overloads
 Disconnect Switches
 Distribution Blocks
 Foot Switches
 Push Buttons / E-stops Slim-line Relays
 Terminal Blocks

ACME Screw
 Linear Actuators
 Electric Cylinders
 Precision Profile Rail System
 Recirculating Ball Screw
 Worm Gear Screw

Air Conditioners
 Filter Fans
 Heat Exchangers
 Heaters
 Stack Light Signals

High Precision Planetary Gearboxes

Cable Entry Systems

Temperature Sensors and Controllers

Bellows Couplings
 Elastomer Couplings
 Line Shafts
 Linear Couplings
 Miniature Couplings
 Torque Limiters

Motor Integrated Roller Screw

Sensor Intelligence.

Advanced Industrial Sensors, Safety Systems,
 Barcode Solutions, Auto Identification

SCADA and HMI Software Products

Speed Sensors, Speed Controllers

Industrial Safety Mats & Safety Mat Controllers

Industrial Enclosures and Accessories

AC/DC Motors
 Integral Gear motors
 Gear Reducers

Special Purpose Sensors
 "Moxley Electronics is the Master Distributor"

Variable Frequency Drives,
 PLCs and PACs,
 Operator Interface Terminals,
 Servo Systems,
 Motion Controllers,
 CNC Systems,
 Industrial Robots

Power Supplies, UPS,
 Power Conditioning,
 Surge Suppression,
 Transformers,
 Islatrol Filters

Industrial Gear Reducers and Gearmotors

CUSTOMER DEVOTION • TECHNICAL EXPERTISE • UNPARALLELED INTEGRITY

What Distinguishes Moxley Electronics from the Rest?

Moxley Electronics is an engineering oriented distribution company that provides solutions in motion control and industrial automation, machine safety, linear motion, and vision applications. Our sales force consists solely of industry-trained engineers who offer cost-effective solutions for today's challenges and tomorrow's complexities. We represent world-class suppliers and seek to build and maintain relationships with world-class customers.

Technical Support Taken to the Next Level

We stand behind all our products, providing on-site technical support and other value-add services including training, consultation, development and design, programming, and schematics. Our Applications Engineers can provide engineered solutions tailored to your application and company.

- 2D and 3D Machine Vision
- PLCs and Smart Relays
- Operator Interface Terminals
- SCADA Software
- Industrial Networking
- Bar Code Scanners
- Industrial Sensors
- Motion Control
- Servo Systems
- Linear Actuators
- Variable Frequency Drives
- Gearmotors and Reducers
- Machine Safety
- Control Panel Components
