Introduction

Company profile

The Woertz company was founded in 1928; our head office is in MuttENZ near Basle, Switzerland.

We are a family business with about 220 employees known as a quality manufacturer of circuitry accessories, installation systems and electronic control systems.

Our goals are:

- security,
- user-friendliness,
- and easy handling of our products.

We are certified according to ISO 9001 and ISO 14001.

Our range of products includes:

- terminals, junction boxes, grounding products, surge protection devices, anchor channels and anchoring studs
- flat cable installation systems
- floor ducts, double floor systems, under-window ducts
- electronic modules and interfaces.

The circuitry accessories and the electronic control systems are produced in our headquarters in MuttENZ, the duct and double floor systems in the branch located in Hölstein.

MuttENZ head office

**The Swiss Association
for Quality and Management Systems**

SQS herewith certifies that the company named below has a management system
which meets the requirements of the normative bases specified below
and issues the company

Woertz AG
CH-4132 MuttENZ 1

Certified area

Whole Company, location MuttENZ and Hölstein

Field of activity

Electrical accessories, Installation systems

on the basis of the audit result the

SQS Certificate
ISO 9001:2000 / ISO 14001:1996

CH-3052 Zollikofen, 25 June 2002

This SQS Certificate is valid up to and including 24 June 2005

Scope numbers 19, 14

Registration number 10501-06

Managing Director SQS

T. Zahner

President SQS

Prof. Dr. H. D. Seghezzi

The SQS certificate ISO 9001 was issued to us 1987 for the first time and renewed regularly. ISO 14001 since 1996.

Introduction

Properties of the insulating materials

The insulating bodies of our terminals are made of polyamide 66. Even if this polyamide is subjected to a constant temperature of 100°C, it fulfills the electrical, mechanical and chemical properties required in terminals. The typical features of polyamide 66 are hardness, rigidity, scuff resistance and thermal endurance.

Fuse terminals and fuse plugs, where constant temperatures of over 100°C can occur, are made of polyamide 66 reinforced with fibreglass.

Polyamide 66 is hardly combustible, self-extinguishing and halogen-free (when a fire breaks out, there can't be any emanation of toxic gas combustion, which, alone or combined with humidity, could result in corrosive precipitations).

Polyamide 66 (reinforced with fibreglass or non-reinforced) is approved by all leading certification and testing institutions.

General properties		Density g/cm ³	1.14
		Humidity-absorption (normal conditions) %	2.8 ± 0.3
		Water-absorption at 23°C (saturation) %	8.5 ± 0.5
Burning behavior			
according to VDE 0304, part 3 (5.70)	class	II b	
according to FMVSS*-302 (condition fulfilled: the flame goes out before the first marker is reached)	mm/min	< 100 * Federal Motor Vehicle Safety Standard No. 302, 1976 (sample 1 mm thick); see also DIN 75 200 (4.75)	
according to UL Standard 94 (sample 1/16" thick)		94V-2	
Toxic behavior		halogen-free	
Mechanical properties	Unit	State of sample	polyamide 66
Yield stress	N/mm ²	dry	90
		moist	65
Elongation at tear	%	dry	20
		moist	> 50
Elastic modulus (tension test)	N/mm ²	dry	3400
		moist	1700
Ductility (notch d=3mm)	kJ/m ²	dry	40
Indentation hardness	N/mm ²	dry	170
		moist	110
Thermal properties	Unit	State of sample	polyamide 66
Heat-resistance according to ISO 75			
Process A	°C	dry	105
Process B	°C	dry	> 200
Fusion temperature	°C	/	260
Longitudinal expansion coefficient	1/K x 10 ⁻⁵	dry	7-10
Thermal conductivity	W/(K x m)	dry	0.23
Specific heat capacity	J/(g x K)	dry	1.7
Electrical properties	Unity	State of sample	polyamide 66
Dielectric constant (10 ⁵ Hz)		dry	3.2
		moist	5.0
Dielectric loss factor tan δ (10 ⁵ Hz)		dry	0.025
		moist	0.2
Dielectric strength	kV/mm	dry	100-150
		moist	30-80
Specific volume resistance	Ω x cm	dry	10 ¹⁵
		moist	10 ¹²
Surface resistance R _{OA}	Ω	dry	10 ¹²
		moist	10 ¹⁰
Creep resistance	CTI	dry / moist	> 600 (non-reinforced)

Spring clamp connecting terminals

To connect one conductor to each clamp.

Springs of stainless steel.

Corrosion resistant, also suitable for marine systems,
for systems with high temperature variations, vibration resistant.

Approved for hazardous locations.

Spring clamp fuse terminals

4 mm², for fuses 5x20 mm

PA 66

- Springs of stainless steel
- Metal parts of nickel-plated copper
- Terminal closed on all sides
- Marking with label or marking strip
- Easy introduction of strands of the nominal cross-section even without end sleeves
- Use funnel-shaped cable entrances for introducing wires and strands with smaller cross-sections
- Insulated, recessed and separable cross-junction racks for 10 terminals
- Fuse-carrier locked in open position
- Available with LED 24V or 230V

Never handle fuse carrier when live!

Additional information:

- With LEDs to indicate damaged fuse
- An easy breakable peg at the bottom part enables two fuse-holders to be joined together
- In a single fuse terminal, a heavier load is possible than in a block of several fuse terminals strung together that heat each other up. This source of heat has to be taken into account when planning.

Spring clamp fuse terminals

4 mm², for fuses 1/4"x 1 1/4" (6.3x32mm)

PA 66

- Springs of stainless steel
- Metal parts of nickel-plated copper
- Terminal closed on all sides
- Marking with label or marking strip
- Easy introduction of strands of the nominal cross-section even without end sleeves
- Use funnel-shaped cable entrances for introducing wires and strands with smaller cross-sections
- Insulated, recessed and separable cross-junction racks for 10 terminals
- Fuse-carriers locked in open position
- Available with LED 24V or 230V

Never handle fuse carriers when live!

Additional information:

- With LEDs to indicate damaged fuse
- An easy breakable peg at the bottom part enables two fuse-holders to be joined together

In a single fuse terminal, a heavier load is possible than in a block of several fuse terminals strung together that heat each other up. This source of heat has to be taken into account when planning.

Partitions and end barriers

Partitions and end barriers

For partitions and end barriers, only one article is offered here. It can be transformed from a partition to an end barrier by breaking off a part at the predetermined breaking point.

Cross-junction racks and accessories

Cross-junction rack

Cross-junction racks can be cut to any desired length with a cutting tool. When they are inserted into a terminal series, at the top, the cross-connection is aligned to the terminal series, and the 12mm long marking labels or the 15mm wide marking strips are above it.

Funnel-shaped cable entrance

Funnel-shaped cable entrances are inserted when conductors, whose cross-sections are smaller than the nominal cross-section of the terminals, are used.

with indicator with LED 230V			

Marking accessories

Marking cards type RB

For marking of 5, 6 or 8mm-wide terminals. Marking cards of polyamide 66, white, with 100 labels per card, printed black (see table below).

Label size: 5 x 5 mm, 5 x 9 mm, 5 x 12 mm, 6 x 9 mm, 6 x 12 mm, 8 x 9 mm or 8 x 12 mm.

Available in boxes containing 5 cards with 100 labels each, i.e. 500 labels per box..

Woertz Service: marking on request (see order form on page 1.3.38).
Individual terminal marking with **Winscript** (see brochure 1.1 "Screw Terminals" page 1.1.104)

Order

We order card(s) of the selected type with printing according to drawing below.

	label type	article number	label size	printing max.
☐	RB/5x5	35455/05S05	5 x 5 mm	3-figure vertically / 3-figure horizontally
☐	RB/5x9	35455/05S09	5 x 9 mm	6-figure vertically / 3-figure horizontally
☐	RB/5x12	35455/05S12	5 x 12 mm	9-figure vertically / 3-figure horizontally
☐	RB/6x9	35455/06S09	6 x 9 mm	6-figure vertically / 4-figure horizontally
☐	RB/6x12	35455/06S12	6 x 12 mm	9-figure vertically / 4-figure horizontally
☐	RB/8x9	35455/08S09	8 x 9 mm	6-figure vertically / 6-figure horizontally
☐	RB/8x12	35455/08S12	8 x 12 mm	9-figure vertically / 6-figure horizontally

Marking strips and marking adaptors

Marking strips for inserting into spring clamp terminals either on top or on the two narrow sides of the terminals.
Can be divided with cutting tool.

Marking strips

Article number	Illustration	Technical data	for terminals
35455/09BS		of thermosetting plastic, white, unprinted Length of strips: 240mm Printable area: 9 mm high Packing unit: 25 pcs.	for all spring clamp terminals
35455/15BS		of thermosetting plastic, white, unprinted Length of strips: 240mm Printable area: 15 mm high Packing unit: 25 pcs.	for all spring clamp terminals except spring clamp terminals 1.5mm ² Art. No. 35330/2 and spring clamp fuse terminals 4mm ² Art. No. 35490, 35495

Marking adaptor Height above terminals: 4.4 mm

35455/59T		Adaptor for labels 5 x 9 mm, grey For clipping on to the slots in the 5mm wide terminals for continuous marking strips when 1 label RB 5x9 should be attached instead. W=4.9mm, L=9.5mm Packing unit: 100 pcs.	to 5mm wide spring clamp terminals with slots
35455/69T		Adaptor for labels 6 x 9 mm, grey For clipping on to the slots in the 6mm wide terminals for continuous marking strips when 1 label RB 6x9 should be attached instead. W=5.9mm, L=9.5mm Packing unit: 100 pcs.	to 6mm wide spring clamp terminals with slots

Rails and accessories

Mounting rails according to EN 60715TH35

Article number	Illustration	Dimension illustration	Technical data
3401			Galvanized steel a=35mm, b=7.3mm, c=27mm, d=1mm Corresponds to the thermal resistance to short-circuits of a Cu conductor of 16mm ² Made in lengths of 2m, weight 325 g/m
3401/L			Galvanized bored steel, 18 x 5.2 mm a=35mm, b=7.3mm, c=27mm, d=1mm Corresponds to the thermal resistance to short-circuits of a Cu conductor of 16mm ² Made in lengths of 2m, weight 310 g/m
3401IN			Stainless steel A2 a=35mm, b=7.3mm, c=27mm, d=1mm Corresponds to the thermal resistance to short-circuits of a Cu conductor of 16mm ² Made in lengths of 2m, weight 365 g/m
3490			Galvanized steel a=35mm, b=15mm, c=24mm, d=1mm, d1=2.5mm Corresponds to the thermal resistance to short-circuits of a Cu conductor of 50mm ² Made in lengths of 2m, weight 925 g/m
3490/L			Galvanized bored steel, 18 x 5.2 mm a=35mm, b=15mm, c=24mm, d=1mm, d1=2.5mm Corresponds to the thermal resistance to short-circuits of a Cu conductor of 50mm ² Made in lengths of 2m, weight 890 g/m
80290			Copper a=35mm, b=15mm, c=24mm, d=1mm, d1=2.3mm Corresponds to the thermal resistance to short-circuits of a Cu conductor of 150mm ² Made in lengths of 2m, weight 765 g/m

Combined rails

3400A			external profile flanks according to EN 60715TH35, internal profile flanks according to EN 60715TH15 aluminum alloy, Extrudal-050 a=35mm, b=7.3mm, c=27mm, d=1mm, e=15mm Corresponds to the thermal resistance to short-circuits of a Cu conductor of 35mm ² Made in lengths of 2m, weight 260 g/m
80291/2M			external profile flanks according to EN 60715TH35, internal profile for receiving Woertz anchoring studs series 4420 and Woertz cable fixing brackets series 4350. aluminum alloy, Extrudal-050 a=35mm, b=15mm, c=35mm, d=1mm, d1=1.8mm, e=116.7mm Corresponds to the thermal resistance to short-circuits of a Cu conductor of 85mm ²
80291/3M			80291/3M Made in lengths of 3m, weight 379 g/m
80291/6M			80291/6M Made in lengths of 6m, weight 379 g/m

Accessories to mounting rails according to EN 60715 TH 35

Cable-fasteners for clipping

Article number	Illustration	Dimension illustration	Technical data
80063			for clipping on to rails according to EN 60715TH35 of polyamide 66, grey For use in switchboards. Delivered without cable straps. Any cable straps may be used with these fasteners.
80064			80063 for cables $\varnothing$ 6-9mm W=10mm Packing unit: 100 pcs
80065			80065 for cables $\varnothing$ 12-16mm W=18mm Packing unit: 25 pcs
80066			80064 for cables $\varnothing$ 9-12mm W=14mm Packing unit: 100 pcs
			80066 for cables $\varnothing$ 16-20mm W=22mm Packing unit: 25 pcs

Clamps for clipping

9072			for clipping on to mounting rails according to EN 60715TH35, of polyamide 66, grey may be used for mounting devices, with 3 borings for cylinder head self-tapping screw $\varnothing$ 3.5mm Packing unit: 100 pcs
49907			for clipping on to mounting rails according to EN 60715TH35, of polyamide 66, grey may be used for mounting devices extending beyond the clamp, with 3 borings for cylinder head self-tapping screw $\varnothing$ 3.5mm. Packing unit: 100 pcs

Supporting studs for covers

80059/31	H mm 31	Base part of brass, stud of steel for mounting rails according to EN 60715TH35 with bolt thread and sealing screw M3 Clamping couple for electric screw-driver 0.8 Nm. Width = 6mm Packing unit: 50 pcs	To terminal covers Art. No. 80079/10, 80079/35, 80079/120 see page 1.1.92
80059/38	H mm 38		
80059/45	H mm 45		
80059/55	H mm 55		
80059/65	H mm 65		
80059/75	H mm 75		

Accessories to mounting rails according to EN 60715 TH 35

Label carrier for group marking

Article number	Illustration	Dimension illustration	Technical data
3459			of polyamide 66, grey, halogen-free to mounting rails according to EN 60715TH35 with label 10x37mm of PVC, white Under the label 10x37mm the label carrier for group marking has a boring for screwing on any other marking label or marking strip with a cylinder head self-tapping screw $\varnothing$ 2.9x9.5mm Packing unit: 100 pcs

Mounting bracket

80360/30			of sheet steel, 2 mm, zinc-plated 89mm long, 20 mm wide, 48mm high bent 30° with M6 thread for clear arrangement of terminals Packing unit: 10 pcs.
